

Meridian Technical Charter High School

The purpose of Meridian Technical Charter High School is to expand the academic choices available to students who are interested in technical fields.

MTCHS offers an environment rich in technology, giving students experience using technical applications in school and in the workplace, while still providing a comprehensive and rigorous academic education.

MTCHS offers tech areas highlighting computer, electronic, media, networking, software, and web technologies. Areas provide foundations to computer related engineering fields.

MTCHS requires seniors to complete a 280 hour internship with Treasure Valley businesses in one of the above areas.

We offer classes for college credits and industry certifications.

MTCHS CORE VALUES
